

medi

medi's comfort line

Supports and braces –
user comfort for the
whole day

medi. I feel better.

medi World of Compression

A strong brand. A wide range of products. Holistic concepts.

The medi World of Compression: A signpost to the future with 75 years experience in compression. Your partner for the highest requirements of quality, innovation and design. Let us shape the future together and create positive brand experiences – for you and your patients.

Offers security, stability and noticeable relief

Beneficial and effective therapy with products that combine proven medical effectiveness with special user comfort.

The wide range of supports from medi allows you to offer your patients the fitting solution for many indications. Supports from medi are tailored to the needs of your patients, down to the smallest detail. New technologies and numerous comfort features ensure that patients enjoy wearing the support on a regular basis – a big plus for achieving therapy adherence and long-term satisfied users.

medi's comfort knit

medi Comfort Zone

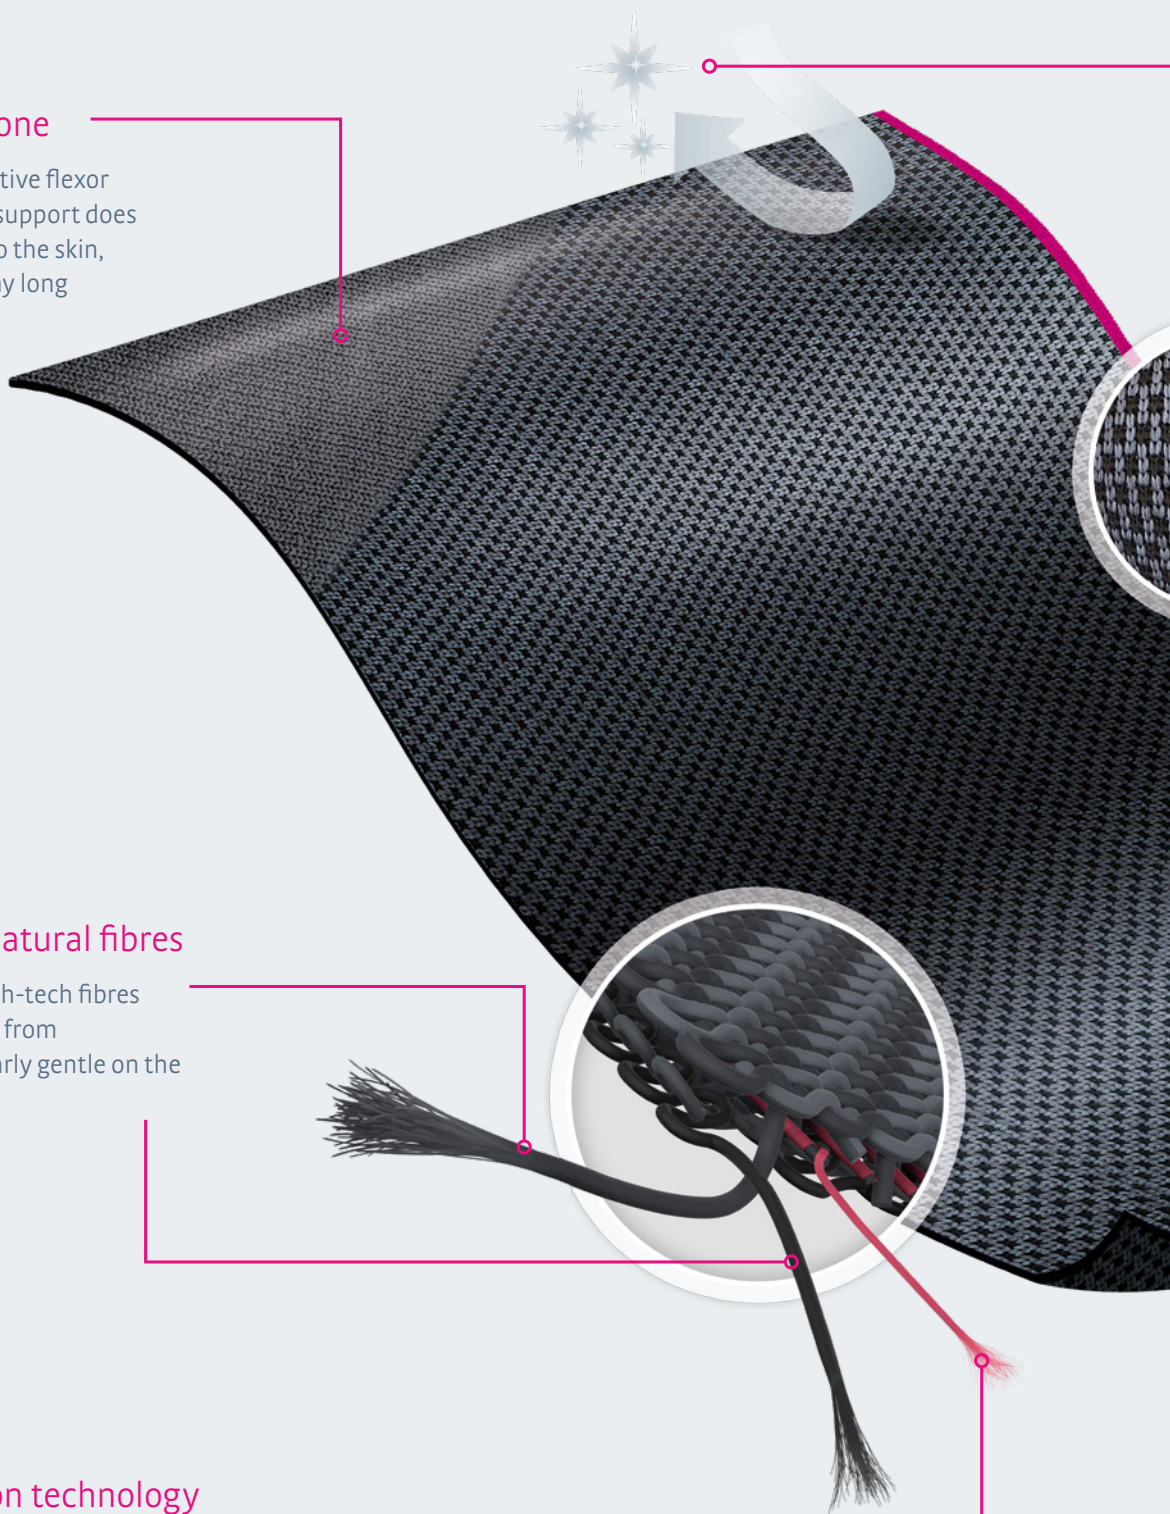

Soft zones in the sensitive flexor areas ensure that the support does not press on or cut into the skin, even when worn all day long

Functional and natural fibres

The combination of high-tech fibres and natural fibres (e.g., from eucalyptus) is particularly gentle on the skin.

medi compression technology

The compressive knitted fabric can improve proprioception. The improvement in proprioception supports the body's own guidance and stabilizes the joint

medi Clima Fresh²

Integrated Clima Fresh function
– odour-inhibiting effect

Fit and elasticity

Highly elastic across and along the length with total compression effect. Comfort material for all Lumbameds Comfort Zone with 2-zone knitted fabric makes it easy to put on and comfortable to wear with proven stability.

medi Clima Comfort

- wicks moisture away from the skin's surface quickly
- guarantees a high level of breathability

SEAQUAL YARN for our new Lumbamed range³

What is SEAQUAL YARN?

The new Lumbamed knitted fabric consists of twelve percent SEAQUAL YARN – a yarn made from recycled PET bottles: On average, this corresponds to a **one-litre bottle per product**.

For more information,
please visit:
medi.biz/seaqual

Very easy to use

When it comes to soft supports, the wellbeing factors are wearing comfort as well as easy handling. This is crucial to ensure that the aid is worn regularly. For 84 percent of patients, it is important that the product is easy to put on and take off.¹

Bandages and orthoses from medi impress not only with their medical effectiveness but also with their exceptional wearing comfort. With the comfort-knit technology, users experience maximum comfort – an essential feature for regular use and optimal therapeutic outcomes.

² Not for Lumbamed range.

³ Not for Lumbamed maternity

Manumed active

Comfort wrist support for soft tissue compression with stabilizing rod

Comfort Zone
Fit adapts to the body with high elasticity, particularly in the thumb area, achieved via an optimized Comfort Zone

Supple border prevents constriction

Soft on the skin, thanks to a special hybrid fabric created from high-tech fibre and natural eucalyptus fibre

Effective support and stabilisation via optimally sized, anatomically pre-moulded hand splint

Accessories

In every product pack

Donning aid
For easy donning

Also available as
**Manumed active
E+motion®**

Intended purpose: Manumed active (E+motion) is a wrist compression support.

Epicomed®

Comfort elbow support for soft tissue compression with 3D silicone pads

Wide cuff

Broad, flexible border for a secure and pleasant fit. Extra length in the upper arm to cover soft connective tissue ①

medi Comfort Zone ③

Soft, fine and elastic to elicit significantly more comfort, in the sensitive joint areas

3D silicone pad
Relieves pain and dissipates swelling (oedema, haematoma)

Removable strap for individual pressure regulation

Innovative comfort knit fabric with a fit that moulds to the body and supple borders ②

Therapy support

Using the QR-Code or the Short-URL medi.biz/epi to access therapeutic exercises

Also available as Epicomed® E+motion®

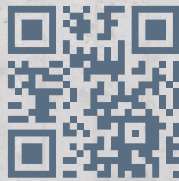

Intended purpose: Epicomed® (E+motion) is an elbow compression support with pads.

Accompanying exercises for a holistic therapy approach

Your patients can access free therapy-accompanying exercises for

- non-specific back pain,
- facet joint osteoarthritis,
- slipped disc and
- sacroiliac joint syndrome (SIJ).

Accessible by scanning the QR code and
do them easily at home.

Lumbamed® basic

Lumbamed® sacro

Lumbamed® disc

Lumbamed® pro

Lumbamed® facet

Lumbamed® plus

Lumbamed[®] sacro NEW

Modular pelvic brace for stabilisation and with massage pads

Comfort fit
Modular design allows individual adjustment to pain sensation and degree of movement during therapy-oriented use.

Acute variant

Light variant

Night variant

Comfort effect
Flexibly positionable massage pads offer targeted massage of pain points

Comfort Effect
The precise belt system allows for individual and continuous adjustment of the circular pressure around the pelvis

Comfort Effect ①
Circular compression and stabilisation of the pelvis and sacroiliac joints provide pain relief

Comfort Handling
Hand loops on both sides make it easy to put on

Optional accessories
Night closure
(item no.: K.280.239)
available to purchase

intended purpose: Lumbamed[®] sacro is a brace for stabilisation of the pelvis.

Lumbamed® maternity

Lumbar brace for stabilisation during pregnancy

Comfort Fit
Stomach belt can be adjusted without interval and is easy to adjust to accommodate the growing stomach

Integrated stabilizing rods and the individually adjustable strap system absorb the increased load caused by the growing weight of the belly and relieve the abdominal wall and pelvis. The lumbar spine is stabilized.

Comfort Handling
External hand strap make it easy to put on ②

Comfort Handling
Tension straps to adjust the device to the individual ①

Comfort Material
Pleasant, soft material makes it easy to put on and comfortable to wear

Therapy support

Using the QR-Code or the Short-URL medi.biz/maternity to access patient information

Intended purpose: Lumbamed® maternity is a brace for stabilising the lumbar spine using pressure that can be applied at different levels.

Lumbamed[®] plus NEW

Lumbar brace with pad for stabilisation and massage

Comfort Effect ^①

• Compressive knitted fabric and Vario-Flex pad ensure de-lordosis of the lumbar spine and pain relief

Comfort fit

Fold-down closure edges ensure a high level of comfort when moving and sitting

Comfort Handling

Hand loops on both sides make it easy to put on

Comfort Handling

Practical finger tab makes it easier to open the brace

Comfort Material

Comfort Zone with 2-zone knitted fabric makes it easy to put on and comfortable to wear with proven stability

Comfort fit

Body-conforming fit in the sensitive flexion area offers high wearing comfort

Intended purpose: Lumbamed[®] plus is a brace for stabilisation of the lumbar spine with back pad.

SOON

Lumbamed® basic

Lumbar brace for stabilisation

Comfort Fit
Fold-down closure edges ensure a high level of comfort when moving and sitting

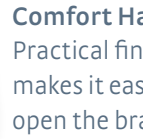

Comfort Material
Comfort Zone with 2-zone knitted fabric makes it easy to put on and comfortable to wear with proven stability

Comfort Fit
Body-conforming fit in the sensitive flexion area offers high wearing comfort

Comfort Handling
Hand loops on both sides make it easy to put on

Comfort Handling
Practical finger tab makes it easier to open the brace

Intended purpose: Lumbamed® basic is a brace for stabilisation of the lumbar spine.

Lumbamed® facet NEW

Lumbar brace for targeted relief of the facet joints

Comfort Material
Comfort Zone with 2-zone knitted fabric makes it easy to put on and comfortable to wear with proven stability

Comfort Fit
Fold-down closure edges ensure a high level of comfort when moving and sitting

Comfort Handling
Hand loops on both sides make it easy to put on

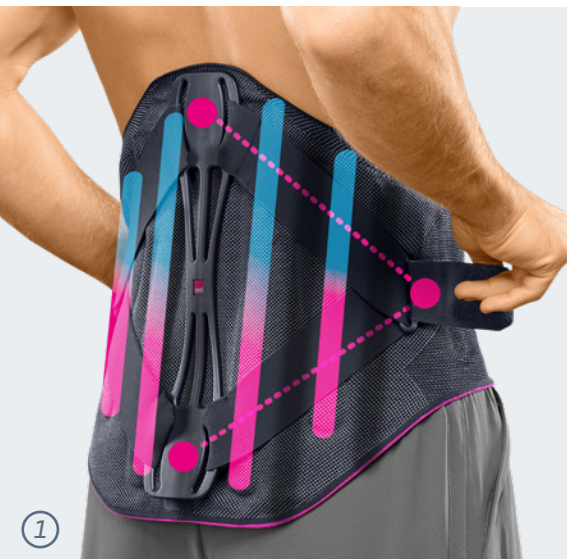

Comfort Effect

- Integrated support elements provide enhanced stabilization and relief of the lumbar spine
- The precise double 3-point strap system enables individual and infinitely variable adjustment of the circular pressure around the body ①

Comfort Fit
Body-conforming fit in the sensitive flexion area offers high wearing comfort

Intended purpose: Lumbamed® facet is a brace for partial stress relief of the lumbar spine via correction of lordosis.

Lumbamed[®] disc NEW

Modular lumbar brace for stress relief and phase-appropriate mobilisation

Comfort Fit

Fold-down closure edges ensure a high level of comfort when moving and sitting

Modular design allows individual adjustment to pain sensation and degree of movement during therapy-oriented use: bridging pad including tension straps is removable.

Relief phase

Mobilisation phase

Comfort Effect

Integrated support elements provide enhanced stabilization and relief of the lumbar spine ①

Comfort Effect

The precise 3-point strap system enables individual and infinitely variable adjustment of the circular pressure around the body ①

Comfort Handling

Hand loops on both sides make it easy to put on

Comfort Material

Comfort Zone with 2-zone knitted fabric makes it easy to put on and comfortable to wear with proven stability

Body-conforming fit in the sensitive flexion area offers high wearing comfort

Intended purpose: Lumbamed[®] disc is a brace for partial stress relief via correction of lordosis and functional mobilisation of the lumbar spine.

Lumbamed® pro NEW

Modular lumbar brace for stress relief and phase-appropriate mobilisation

Comfort Effect
Integrated support elements provide enhanced stabilization and relief of the lumbar spine ①

Comfort Material
Comfort Zone with 2-zone knitted fabric makes it easy to put on and comfortable to wear with proven stability.

Comfort Fit
Fold-down closure edges ensure a high level of comfort when moving and sitting

Comfort Fit
Tension straps and Vario-Flex pad are separately removable

Relief phase

Mobilisation phase

Comfort Effect
The precise 3-point strap system enables individual and infinitely variable adjustment of the circular pressure around the body ①

Comfort Handling
Hand loops on both sides make it easy to put on

Comfort Fit
Body-conforming fit in the sensitive flexion area offers high wearing comfort

Comfort Effect
Flexibly positionable Vario-Flex pad offer targeted massage of pain points ①

Intended purpose: Lumbamed® disc is a brace for partial stress relief via correction of lordosis and functional mobilisation of the lumbar spine.

Genumedi® plus

Knee support with patella silicone ring and additional straps

medi Comfort Zone
with rippled structure for a higher level of comfort in the hollow of the knee

Open enclosure ②
Perceptibly decreased pressure on the kneecap due to open enclosure of the patellar silicone ring: the internal fabric pocket, in which the pad is located, is open in the center and only connected to the knitted fabric at its outer edge. This means that the entire knitted fabric remains elastic on the kneecap and pressure is reduced

Non-slip ③
Optimal anti-slip feature: silicone dot coating and secure connection between the knit fabric and lateral incorporated rod

Additional straps ①
Ensure a high level of comfort

3-D-silicon pad
Integrated silicone pad with 3D profile dissipates swelling (oedema, haematoma)

Intended purpose: Genumedi® plus is a knee support for soft tissue compression.

Genumedi®

Comfort knee support for soft tissue compression with 3D silicon pad

Non-slip

Optimal anti-slip feature: silicone dot coating and secure connection between the knitted fabric and lateral splint material

medi Comfort Zone

With rippled structure for a higher level of comfort in the hollow of the knee

Open enclosure

Perceptibly decreased pressure on the kneecap due to open enclosure of the patellar silicone ring: the internal fabric pocket, in which the pad is located, is open in the center and only connected to the knitted fabric at its outer edge. This means that the entire knitted fabric remains elastic on the kneecap and pressure is reduced

medi Soft Edge

No cutting-in of the ends of the bandage thanks to the unique knitting technique

Extrawide Version

Extrawide Short Version

3D silicone pad

Dissipates swelling (oedema, haematoma) via integrated 3D-silicone pad

Also available as **Genumedi® E+motion®**

Intended purpose: Genumedi® (E+motion) is a knee support for soft tissue compression.

Genumedi® PA

Knee brace for relieving pain at the Pes anserinus tendon insertion

Grip-Ons
Lateral grip knobs additionally facilitate donning

medi Comfort Zone with rippled structure
Higher level of comfort in the hollow of the knee

3D-thigh pads
Restoration of muscular balance in the long term

3D-patella pad
Laterally reinforced for a secure guiding of the patella

3D-tendon pad
Stimulation of the Pes anserinus tendon insertion for pain relief

Offset belt system
Well-balanced distribution of pressure

Therapy support

Access therapy-accompanying exercises using the QR code or short URL medi.biz/PA

Also available as Genumedi® PA extrawide with topband

Intended purpose: Genumedi® PA is a brace which guides patella tracking.

Genumedi® PT

Knee brace promoting muscular balance in cases of patellar lateralisation

Grip-Ons

Lateral grip knobs additionally facilitate donning

medi Comfort Zone with rippled structure

Higher level of comfort in the hollow of the knee

Muscle-relaxing pad with individually adjustable strap

- Trigger-point response to relax the outer thigh muscle (vastus lateralis muscle)
- Strap to adjust pressure on the pad

3D-thigh pads

Restoration of muscular balance in the long term

3D-patella pad

Laterally reinforced for a secure guiding of the patella

Therapy support

Access therapy-accompanying exercises using the QR code or short URL medi.biz/PT

Also available as Genumedi® PT extrawide with topband

Intended purpose: Genumedi® PT is a brace which guides patella tracking.

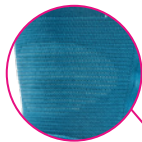

Genumedi® PSS

Knee brace for relieving pain at the patellar tendon insertion

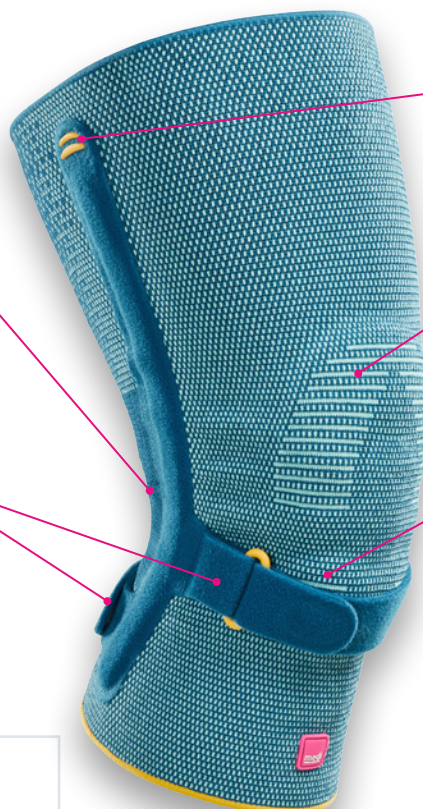

medi Comfort Zone with rippled structure

Higher level of comfort in the hollow of the knee

Patella-Strap

- individual pressure adjustment on the patellar tendon
- no cutting-in thanks to offset strap system

Grip-Ons

Lateral grip knobs additionally facilitate donning

3D-patellar pad

Secure guiding of the patella

3D-tendon pad

Stimulation of the patellar tendon for pain relief

Therapy support

Access therapy-accompanying exercises using the QR code or short URL medi.biz/PSS

Also available as Genumedi® PSS extrawide with topband

Intended purpose: Genumedi® PSS is a brace for influencing the patella glide path.

Genumedi® pro

Knee brace for physiological guidance of the knee joint

Grip-Ons
Lateral grip knobs additionally facilitate donning

Individually adjustable straps
Wrap-around straps on upper and lower leg for additional hold

Therapy support

Access therapy-accompanying exercises using the QR code or short URL medi.biz/pro

Easy-glide hinges

For relief on the knee joint and support of the physiological roll/glide movement

3D silicone pad

Pain relief and dissipation of swelling (oedema, haematoma) via integrated 3D silicone pad

Open enclosure

Perceptibly decreased pressure on the kneecap due to open enclosure of the patellar silicone ring: the internal fabric pocket, in which the pad is located, is open in the center and only connected to the knitted fabric at its outer edge. This means that the entire knitted fabric remains elastic on the kneecap and pressure is reduced

medi Comfort Zone with rippled structure

Higher level of comfort in the hollow of the knee

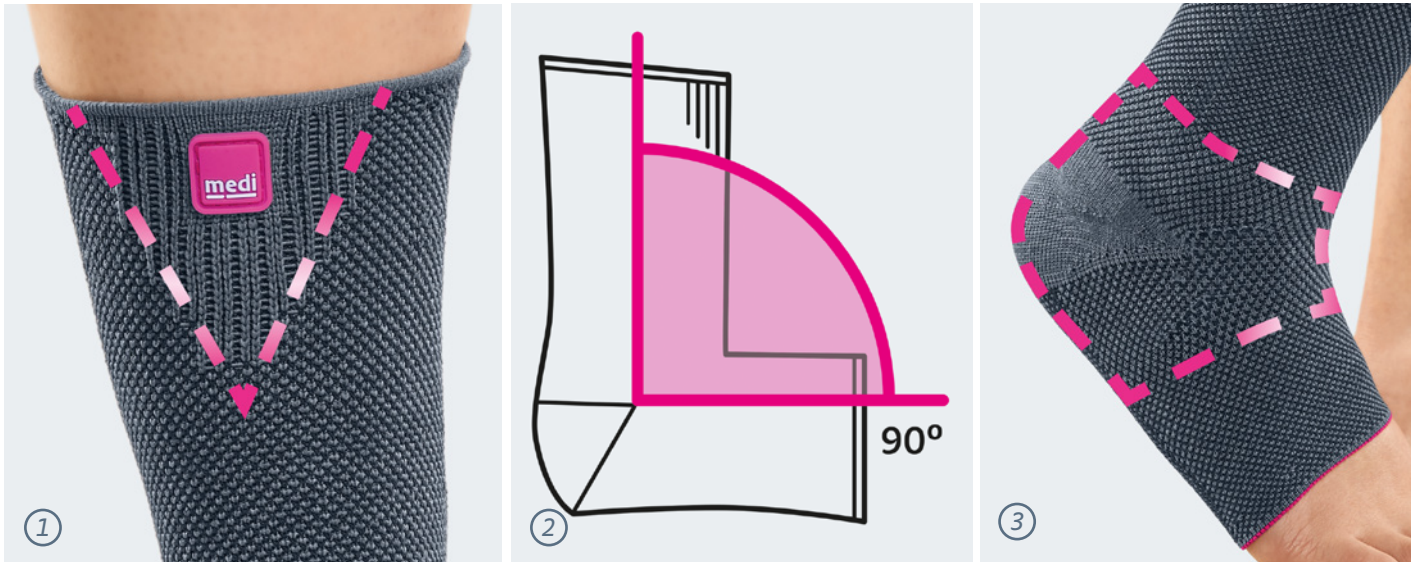

Also available as Genumedi® pro extrawide with topband

Intended purpose: Genumedi® pro is a knee support brace without limitation of extension / flexion.

Achimed[®]

Comfort bandage for soft tissue compression of the achilles tendon with 3D silicone pad

3D silicone pad

Enlarged 3D silicone pad – split in two for a gentle massage effect without pressure on the Achilles tendon

Innovative knitted shape:

at a 90-degree angle, emphasises the arch of the foot, reinforces and lengthens the underfoot – for a good and comfortable fit ②

Comfort knit

Unique comfort knit with stretch zone on the top border for easier donning ①

Extended relief zone

in the instep area due to higher transverse and longitudinal elongation of the knitted fabric ③

Equipment

In every product pack

Easy to put on using included donning aid

Separate heel wedges for tendon relief

Therapy support

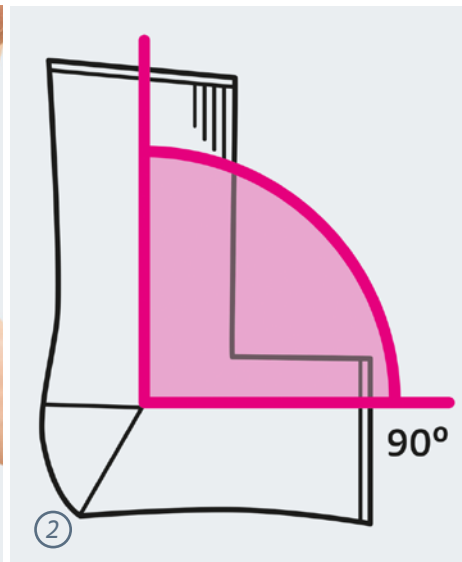

Access therapy-accompanying exercises using the QR code or short URL medi.biz/achimed

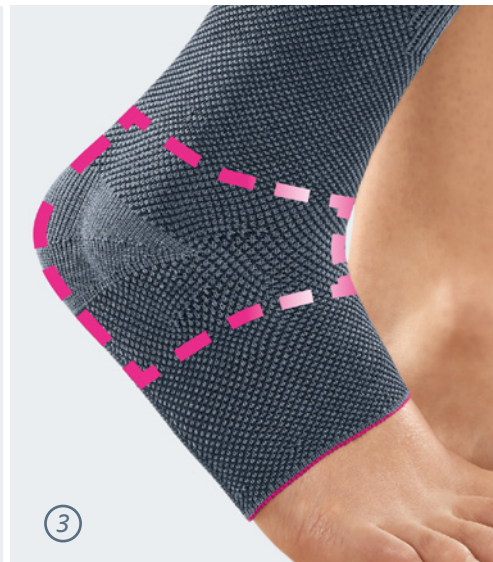

intended purpose: Achimed[®] is a bandage for compression of the achilles tendon.

①

②

③

Levamed®

Comfort ankle support for soft tissue compression with 3D silicon pads

3D silicone pad for massage and swelling reduction

Extended relief zone in the instep area due to higher transverse and longitudinal elongation of the knitted fabric ③

Innovative knitted shape: at a 90-degree angle, emphasises the arch of the foot, reinforces and lengthens the underfoot – for a good and comfortable fit ②

Unique comfort knit with stretch zone on the top border for easier donning ①

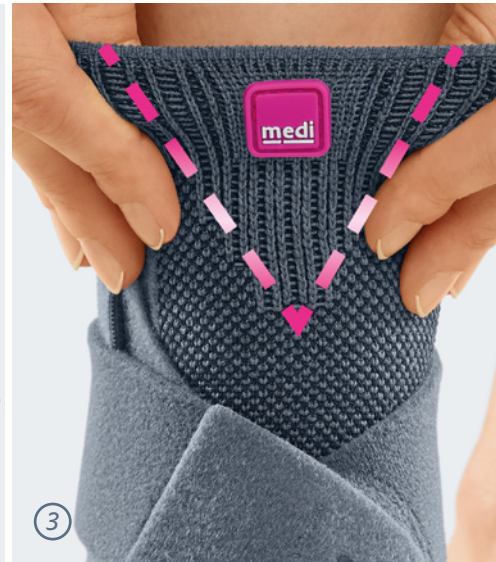

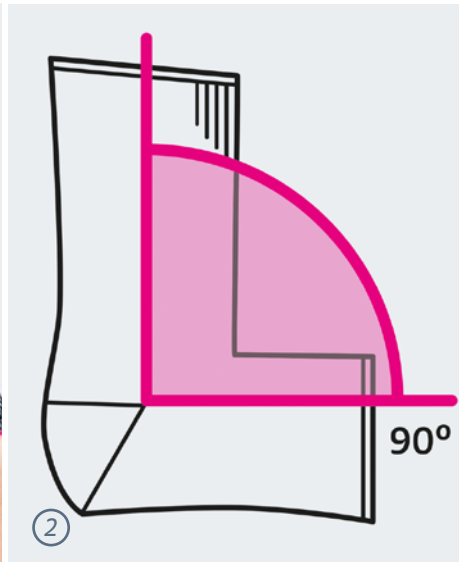

Accessories

Easy to put on using included donning aid

Also available as **Levamed® E+motion®**

Levamed® active

Comfort ankle support for soft tissue compression with elastic strap

Proven stabilisation strap:

Can be individually shortened and removed

3D silicone pad

for a gentle massage effect and to reduce swelling

Unique comfort knit with stretch zone on the top border for easier donning ③

Extended relief zone in the instep area due to higher transverse and longitudinal elongation of the knitted fabric ①

Innovative knitted shape: at a 90-degree angle, emphasises the arch of the foot, reinforces and lengthens the underfoot – for a good and comfortable fit ②

Accessories

Easy to put on using included donning aid

In every product pack

Intended purpose: Levamed® active is a support for compression of the soft tissue in the ankle joint with additional functional elements.
